In this year of grim anniversaries for Palestine, advocates for a just resolution to the Israel-Palestine crisis recognize how deeply the occupation has embedded itself into Palestinian life. "Perspectives on Palestine" presents thoughtful, progressive voices about the situation that are often drowned out by more polarized opinions. This year marks a century since the Balfour Declaration, 70 years since the United Nations Partition Plan, 50 years since the Six-Day War and 10 years of the blockade of the Gaza Strip. It is also the 10<sup>th</sup> anniversary for NJP and its work to raise awareness about the plight of the Palestinian people.
